

Bruno Cardamone

Full Stack Developer

Professional Summary

Full Stack Developer with hands-on experience in building web applications using .NET Core, Angular.js, SQL Server, and React.js. Proven track record in designing scalable architectures, developing reusable components, and optimizing API consumption through asynchronous operations.

Throughout my career, I have taken on technical leadership and mentoring roles, guiding junior developers, promoting best development practices, and improving team efficiency through modular solutions and automated processes. Skilled in enhancing system performance, ensuring code quality, and delivering solutions aligned with business goals.

Mid-Senior Full Stack Developer

Cycle Integrated Services | January 2024 / Present

- I developed reusable logic and generic components, accelerating development across multiple projects.
- I led the design and implementation of scalable and modular backend architectures using .NET and Angular, improving system efficiency and maintainability.
- Optimized the asynchronous API, reducing response times and system resource usage by approximately 80%.
- I mentored junior developers, improving code quality and promoting best practices through workshops and technical guidance.
- I enhanced team performance by improving communication flows and implementing long-term technical solutions.
- I designed and deployed a data integration solution connecting the SID system with HID Hospitals through .NET Framework 4 and Azure Functions, enabling secure and reliable real-time information exchange.

Frontend Developer

AR-WEB | November 2023 / February 2024

- Led the development of a high-performance e-commerce platform using React.js and CSS.
- Optimized existing codebase, implementing complex logic efficiently and ensuring high API performance.
- Improved documentation, code quality, and UX/UI design for better user engagement.
- Strengthened team communication and problem-solving under tight deadlines.

Junior FullStack Developer

Self-employed | February 2022 / March 2023

- Designed and developed custom landing pages for various clients, ensuring modern layouts optimized for conversion.
- Built restaurant websites including interactive menus, booking forms, and simple contact systems to improve customer engagement.
- Implemented basic SEO practices, performance optimization, and responsive design to ensure compatibility across devices.
- Managed projects independently, maintaining direct communication with clients and delivering on tight deadlines.

Skills

- Frontend: Angular.js, Typescript, Tailwind, React.Js
- Backend: ASP.NET Core, SQL Server, Node.js, Python, Express, MongoDB
- Soft Skills: Communication, leadership, problem-solving, stress management, proactivity
